**GaleWrap**

**Oriented  
Film**

**Made in Australia**  
**The Best Hand Wrap**  
**Option for your Business.**

ITW GaleWrap customers  
say it best... "GaleWrap:

**\*Costs less!**

**\*Easier to use!**

**\*Stays tight!"**

**New  
Product**

**Increases Wrap Productivity**

**Improves Load Containment**

**Lowers Pallet Wrapping Costs**

**Reduces Waste**

**Enhanced Employee Safety**

  
**GaleWrap**

**They're Wrapped in it..  
Are you?**

**The Problem:** Issues with wrapping pallets by hand with conventional hand film.

**The Solution:** The Secret is in the Oriented Film  
Benefits of GaleWrap Oriented Film

## Points to consider:

- Wrapping pallets by hand is hard work!
- Loads are rarely wrapped consistently correct.
- Injuries and Medical expenses due to strains and slipping cost you.
- Conventional hand film must be stretched over 150% to be effective.
- On average, hand wrap is rarely stretched more than 20%-resulting in poorly wrapped pallets.

## Costs that can "Significantly" Affect your bottom line

### Waste.

Waste due to "nicked, bruised or "telescoping" rolls can add 10% to 30% to hand film cost.

### Employee Injuries.

An average worker's compensation claim in Australia cost thousands. 44% of New\* claims are due to sprains & strains of joints & adjacent muscles. Types of injuries resulting from: Bending, Pulling, Pushing, Repetitive Motion and Slipping.

### Load Failures

Load failure cost due to improperly wrapped loads can run between .1% to 3.0% of the annual value of products shipped.

### Unstable Work Force

In general, employees that wrap pallets by hand are very **transient**, resulting in substantially higher cost due to hiring, training, and retaining of employees.

## Increases Wrapping Productivity

GaleWrap® does not "neck down," because it is an oriented film. With GaleWrap® you can wrap pallets with **fewer revolutions** thus increasing your pallet wrapping productivity! Just a Tug 'n Snug™ at the corners of the pallet to wrap loads **faster and tighter!** GaleWrap® is so easy to use!

## Enhanced Employee Safety

GaleWrap® rolls are very light weight decreasing the risk of back injuries! Just a Tug 'n Snug™ at the corners of the pallet to wrap loads **safer and easier!**

## Reduces Waste

GaleWrap® has **hemmed edges** that guarantee you will use the entire roll! GaleWrap® has a **110% Guarantee!** We guarantee you will use the entire roll without it "consistently hanging up," or we will pay you back 110% of your purchase price, in no charge product! **We promise you will use the entire roll!**

## Lowers Total Pallet Wrapping Costs

It is simple, with GaleWrap® you use less film! In comparison to conventional hand wrap, GaleWrap® is less expensive on either a cost per roll, cost per square meter or cost per load basis!

## Improves Load Containment

GaleWrap® has **Post Wrap Contraction™**, so it will continue to "contract" around the load even after the load is wrapped! GaleWrap® has great puncture resistance and if it is punctured, it will not propagate or zipper.

Item: 511327 GALEWRAP 420mm x 450m HEC 170 rolls/pallet
